The above data are based on the Standard Industry Classification of either the site where the work was conducted or in the case of transient work, the SIC code of the company headquarters' site record in our Operational Information database. Some recipients of FFI invoices fit into more than one industry classification so there are minor differences in the total number of invoices issued and the total number of invoices recorded against industry sectors.

HSE has data based on the New Government Office region where the work was recorded in our Operational Information database. Work undertaken at transient sites (such as construction activity) is recorded against the companies Headquarters site and so the data provided for each Government Office region will not include work that has been undertaken in that region but has been recorded against, and invoiced to another part of the UK.
